

QPX3: The New R-28 Panels from Quad-Lock

**More Value for our Customers:
27% More Insulation
and 20% Stronger**

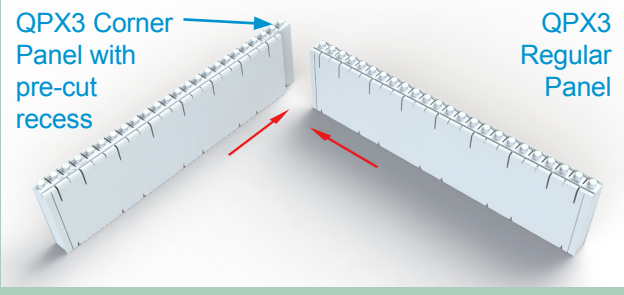

Building in More Value

As the leading innovator in the ICF industry, Quad-Lock keeps adapting its products to the changing needs of the industry and building codes.

The QPX3 Panel System offers the following advantages:

- ▶ Meets and exceeds the new Building Code requirements
- ▶ R-28 Insulation value; **27% more R-value** than most ICFs
- ▶ Even more choices for higher insulation values
- ▶ **20% stronger** than R-22 panels
- ▶ Seamless integration with current Quad-Lock solutions

Design Features

- ▶ Easy to use, **3¹/₈"** thick panel design works with standard Quad-Lock parts and most ICF accessories
- ▶ Use Quad-Lock's standard 2" Metal Track, Wire Top Ties, and Corner Brackets
- ▶ Extremely open cavity for better concrete flow and easy consolidation
- ▶ Flexible options for corner installation:
 - use QPX3 Corner Panels with pre-molded recesses (see above); or
 - simply cut the standard QPX3 panel short by 1" at the marked cut-line
